HC Medical Pharmacy

Cardio Plus+ is 100mg cardiovascular serum and it is an important serum prepared for your daily use and can be used even in healthy condition. It contains garlic and clove as active ingredient; orally taken from the plant itself, which is called Hibiskus sabdariffa, Curcuma Longa, Allium sativum, Curcuma Longa, Syzygium aromaticum and Zingiber officinale in Latin; cardiovascular serum. Helps you become anatomically stronger and more organized. 100% natural prepared for your regular use in your daily life; It is an additive-free serum.

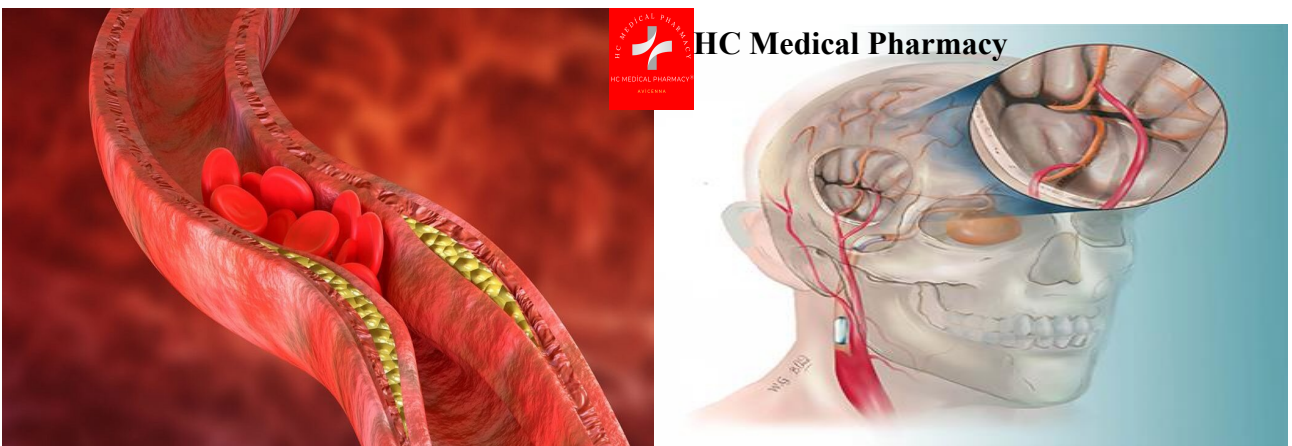

It contains important vitamins and minerals for your cardiovascular health. At the same time, for the heart chambers (atria and ventricles) to pump enough blood; Cardio Plus + 100mg clears the plaque formation of the chambers (vessels) over time.

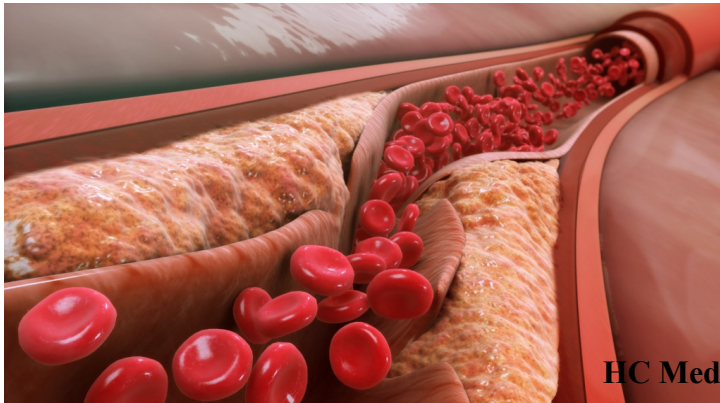

Cardio Plus + 100mg - - - You can use it daily from the age of 4. Cardio Plus + 100mg will end your tired mood and will greatly benefit your cardiovascular health thanks to the vitamins and minerals it contains.

It is very important to use Cardio Plus + 100mg for patients who have stroke, ischemic (vascular occlusion), hemorrhagic (bleeding in the vein) and traumatic stroke patients or patients who are at risk of having stroke.

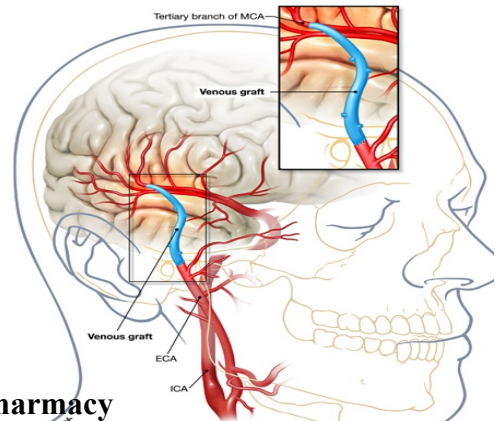

- Soke (stroke), cerebral blood vessels occluded
- Loss of control, sensory changes, cognitive or speech impairment,
- Balance disorder and character disorder beginning with coma

- It is important to use Cardio Plus + 100mg in patients who have had brain damage or seem to be at risk.
- It is of great importance for patients who have had hemiplegia or who are at risk of hemiplegia by your doctor, to use Cardio Plus + 100mg..

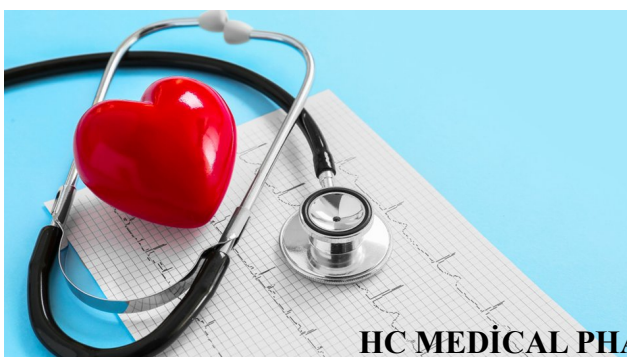

HC Medical Pharmacy

- It helps blood pressure and hypertension patients to use Cardio Plus + 100mg to reduce blood pressure to normal level and normalize body diction.

Blood Pressure

- Blood pressure or blood pressure is the pressure that the heart creates on the vessel wall as it pumps blood to our body.
- Our body needs a certain level of blood pressure. Thanks to this pressure, adequate blood supply to the tissues and maintenance of their vital functions are ensured.
- Cardio Plus + 100 mg helps to normalize blood pressure.

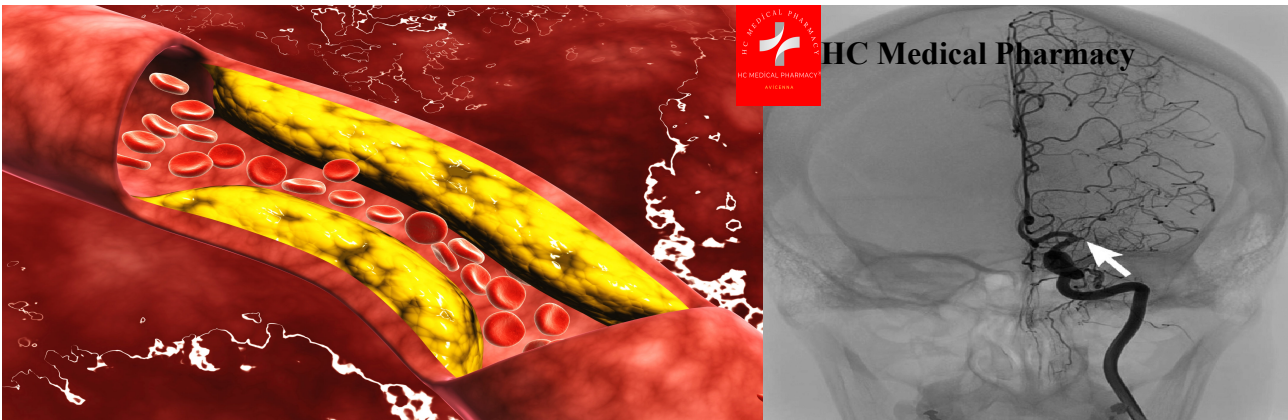

HC MEDICAL PHARMACY

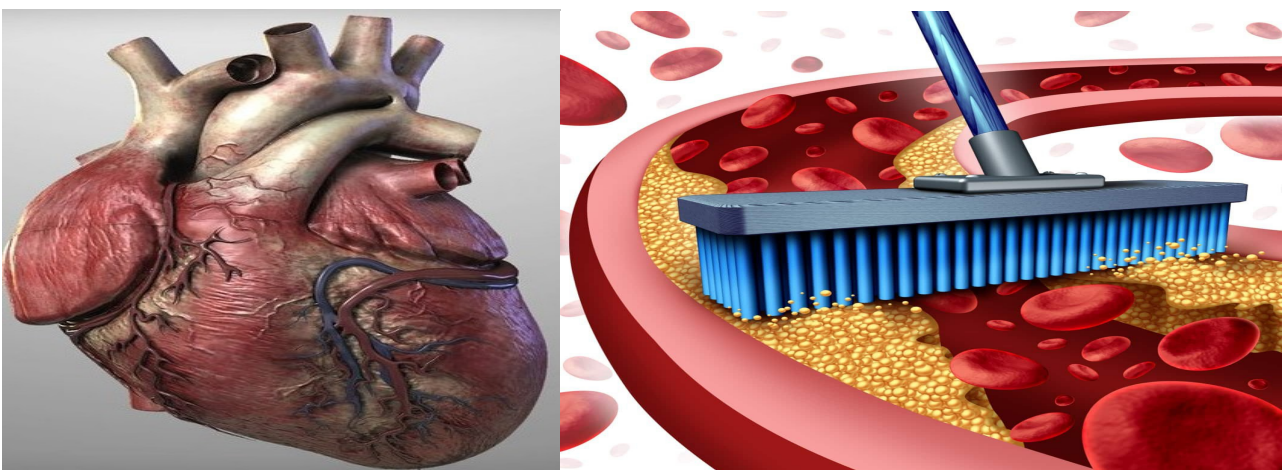

Helps to protect heart, vein and brain health; Cardio Plus + 100mg full reaction is 100% herbal and there is no chemical substance or any element that will harm human health or any substance that will cause a reaction.

Cardio Plus + 100 mg importance and HEART - VASE health

- **HIGH-SENSITIVE CRP:** In recent studies, the relationship between hs-CRP elevation and cardiovascular disease has been revealed. A value of <0.7 mg/L is considered normal, and values above increase the risk of cardiovascular disease.
- **HDL CHOLESTEROL:** The benign cholesterol HDL has a protective role in the development of atherosclerosis. Therefore, a low HDL value below 40 mg/dl constitutes an important coronary risk factor..

- **TRIGLYCERID:** High triglyceride levels do not pose much of a risk on its own in the development of cardiovascular disease. However, low HDL, insulin resistance, small dense LDL and abdominal circumference that often accompany this pose a serious risk. Triglyceride level needs to be kept at 150 mg/dl or less.
- **HYPERHOMOCYSTEINEMIA:** Plasma homocysteine levels above 15 mol/l were defined as an independent risk factor for arteriosclerosis. Those with homocysteine levels above this level increase 3.4 times the risk of myocardial infarction within 5 years..

- **LIPOPROTEIN(a):** It is known that genetically determined lipoprotein(a) elevation is an important risk factor for early myocardial infarction and stroke. Increased Lp(a) and LDL (bad cholesterol) levels, when seen together, constitute an important risk factor for cardiovascular disease.
- Cardio Plus + 100mg helps in protecting the cardio vascular and cerebrum.

How to use Cardio Plus + 100mg?

A - - - Cardio Plus + is a 100mg capsule or ampoule; Open in the morning 25 drops – Open in the evening 25 drops are used by dripping into the water; for children, it can be drunk by dripping into real squeezed fruit juice or ayran.

B - - - Serum in (Cardio Plus + 100 mg) format is also available as ampoules and capsules.

The healthiest way to use it is to be consumed with water. 15 -20 minutes after using Cardio Plus + 100mg. You need to stop consuming food and drink. Do not use any other food supplement or MEDICINE with Cardio Plus + 100mg.

It has a daily tolerance of Extra 10 drops.

Suitable for use from the age of +4.

Olası YAN ETKİLERİ

Those who are allergic to lemon or acidic and have a high allergic reaction

1 lemon: Acid content in the range of 7.2% - 9%

1 piece of Lemon: 5% - 6% Citric acid <<>> PH 2.2 – 3.0

Those who are allergic to Sarmusak and its family and have a high allergic reaction

Those who are allergic or highly allergic to the ginger family;

Those who are allergic or highly allergic to the turmeric family;

Those who are allergic or highly allergic to the himiscus family;

It is not recommended to use with clove allergy and high allergic reaction.

NO SIDE EFFECT IS OBSERVED IN NORMAL SITUATIONS.

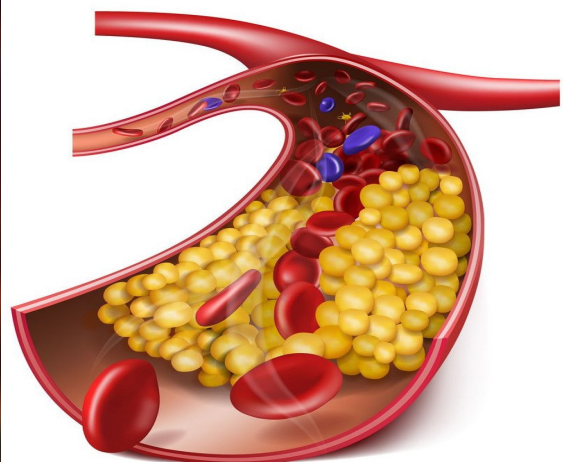

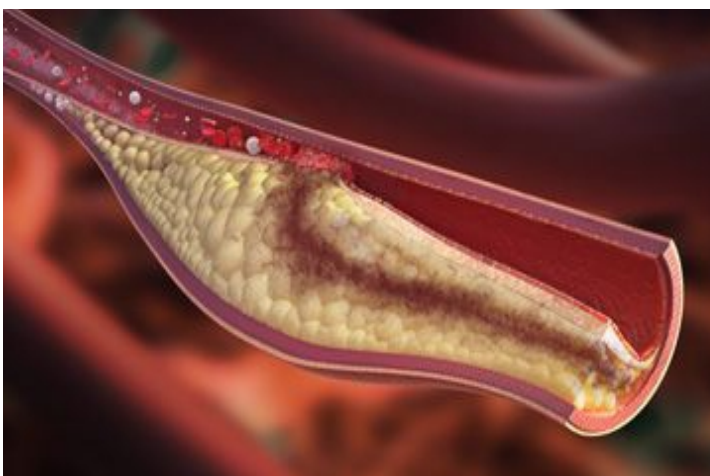

After / before the use of Cardio Plus + 100 mg, the following drugs, supplements and oils can be used.

- Atorvastatin (used to lower blood cholesterol),

- Cyclosporine (used in organ transplants and autoimmune diseases),
- Conivaptan (used for low blood sodium levels),
- Muscle relaxants (e.g. suxamethonium chloride),

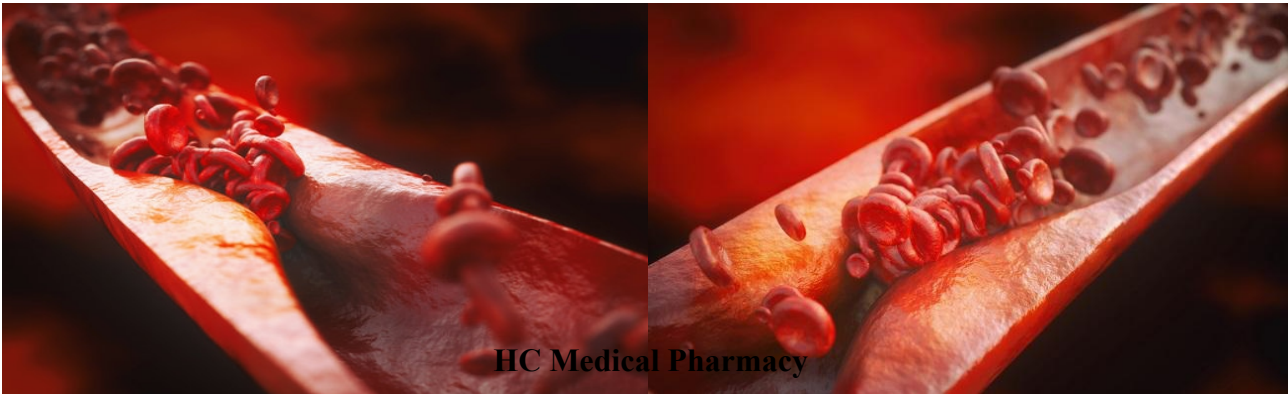

- Phosphodiesterase inhibitors (eg, theophylline, used in the treatment of asthma),
- Medicines that relax the intestines (eg diphenoxylate, loperamide),
- Drugs that increase potassium levels (eg, spironolactone, potassium canrenoate, amiloride, triamterene, potassium salts),
- Drugs that bind to glycoside and reduce glycoside absorption and inhibit enterohepatic (liver-biliary cycle) recirculation (eg, activated charcoal, cholestyramine, colestipol, antacids, kaolin pectin, some mass-enhancing laxatives, sucralfate),
- Metoclopramide (used in the treatment of nausea and vomiting),
- Acarbose (used in the treatment of diabetes),
- P-glycoprotein inhibitors.
- Calcium salts,
- Quinine (used to treat malaria),

- Drugs used in the treatment of infections (eg, macrolide antibiotics [clarithromycin, erythromycin, and azithromycin], tetracyclines, gentamicin, trimethoprim, ritonavir and saquinavir, itraconazole, neomycin, 4-aminosalicylic acid [PAS], rifampicin, benzyl penicillin, amphotericin B),

- Drugs such as diuretics (diuretics) (spironolactone) and laxatives (softeners of intestinal contents) (especially long-term use) that affect the levels of substances important for electrical conduction (electrolytes such as sodium, potassium, etc.),
- Corticosteroids (cortisone derivatives)

- Hormones (eg, adrenocorticotrophic hormone)
- Cytostatic drugs (cancer drugs),
- Medicines used in the treatment of rheumatoid arthritis (eg, penicillamine, sulfasalazine),
- Adrenaline-like drugs (sympathomimetics), eg, salbutamol, are used in asthma.
- Medicines used for pain relief or inflammation (eg, aspirin, indomethacin, Nonsteroidal anti-inflammatory drugs [NSAIDs]),
- Medicines used to treat depression (eg, lithium salts, tricyclic antidepressants, St. John's Wort [*Hypericum perforatum*]),
- Carbenoxolone (used for mouth ulcers and inflammation),
- Medicines used in the treatment of high blood pressure (eg, verapamil, felodipine, tiapamil, captopril, prazosin, beta-blockers, reserpine),
- Drugs used in the treatment of irregular heart rhythm (quinidine, amiodarone, flecainide, propafenone, phenytoin),
- Anticholinergic agents (eg, atropine, propantheline),
- Medicines used to treat anxiety disorders (eg, alprazolam),

Storage of Cardio Plus + 100mg

You can store it at room temperature (20 degrees – 24 degrees)
